1. Update of S&EP Leaflet 15/2019

S&EP Leaflet 15/2019 - Safety and Environmental Management Plan Reviews has been updated to Version 2.0. The update includes a change to the maximum review periodicity required by the leaflet, but this is dependent upon the frequency requirements specified within relevant regulations, the project complexity and the level of risk of the project. A change to the template review question set, along with the addition of SEMP Review Ratings required by the Principal Engineer/Head of Engineering Assurance at declaration has also been included.

The leaflet can be found within [GMP00](#) [1] and the update will be announced under a SEB in due course.
