1. Updates to SMP11 and Hazard Log within Toolkit

After receiving a clarification request regarding the use of eCassandra, guidance has been updated which reinforces the mandatory requirement to use eCassandra. Whilst eCassandra is mandated to use as a Hazard Log Tool, any Delivery Team wishing to use an alternative Hazard Log Tool **must** be able to demonstrate that the proposed Alternative Acceptable Means of Compliance offers the same level of information/granularity so that visual representation and appropriate audit trail can be clarified and justified against the envisaged accident sequence in comparison to the mandated eCassandra tool. <u>SMP11</u> [1] and the <u>Hazard Log</u> [2] within the ASEMS Toolkit have been updated to provide the clarification required.
