Description

1. This SEB announces the publication of S&EP Leaflet 11/2017 – Acquisition Safety Delegations in DE&S.
2. The leaflet sets out the principles for delegating acquisition safety authority in a balanced matrix organisation. The Safety Committee has decided the acquisition safety delegation will continue to be vested in the delivery Team Leader. The delivery Team Leader is now a multi-function assignment, aligned to PM and ILog functions but undertaking safety activities associated with the Engineering function.
3. Multi-functional assignments will not be unique across the organization. The principals detailed in this leaflet offer a standardized approach to delegation and should be adopted with immediate effect.
4. The revised leaflet will shortly be published on the ASEMS and the ASG.

Actions to be taken
