DE&S SAFETY AND ENVIRONMENT BULLETIN (SEB)

Serial Number: SEB/004

Keeping our Safety and Environmental Practitioners informed

Revision of S&EP Policy Leaflet 04/2011 (System Safety & Environmental Protection Role Profiles)

When it takes effect:	September 2014
Valid for:	Until retracted
Point of contact:	Stephen Beedles, DES TECH QSEP-Training ELM 1b, MOD Abbey Wood #4128 Tel: 030 679 37743

Description

1. S&EP Leaflet 04/2011 (System Safety & Environmental Role Profiles) defines a series of seven generic safety and environmental roles against which any member of the DE&S acquisition community can be mapped. The process initially requires users to identify which role is most appropriate for a nominated post. This will identify acquisition safety and environmental protection related competence requirements, in the form of training and experience, that the post-holder must demonstrate. The second part of the mapping process is to record how the post-holder satisfies these requirements and, if necessary, how any shortcomings will be managed.
2. The leaflet has now been up-issued to version 1.2 with changes introduced to capture two main issues:
 - i. The training requirements of the Executive role profile have been updated to record the recently rolled out workshop-based System Safety Executive module (there is no on-line element).
 - ii. The addition of the System Safety Practitioner Examination as essential requirements for the System Safety Manager and System Safety Advisor/Regulator profiles, and as a desirable requirement for the System Safety Officer profile.

Actions to be taken

3. Staff members are to review training plans to ensure compliance with the updated requirements.
